Art Unit: 1651

1. Claims 1-10 are present in the instant application.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to gel composites, classified in class 428, subclass one plus.
 - II. Claims 8-10, drawn to articles of clothing, classified in class 442, subclass 59.
3. The inventions are distinct, each from the other because:

Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful for a number of products per se and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1651

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. If Applicant elects Invention I, Applicant is requested to clearly delineate the claimed patentable differences between the instant claims and a number of other Applicant's own copending or patented claimed gel composites.

6. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification. There are holes at the top of the pages 2, 4, 5, 6, 7, 8, 9, 10, 12-9,21-33,36-38 which holes have punched out part of the first line of the above pages. Applicant is required to submit legible copies.

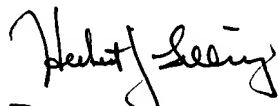

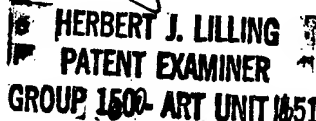

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Lilling whose telephone number is (703) 308-2034 and fax number (Art Unit 1651) is (703) 305-7939 or SPE Michael Wityshyn whose telephone number is (703) 308-4743.
